

# NEED HELP FINDING YOUR HOSPITAL?

**Search by selecting any of five categories: Atrial Fibrillation, Heart Failure, Resuscitation, Heart Attack (STEMI) and Stroke.**

---

## SEARCH BY LOCATION

---

Type in your address, city/state or zip and select the distance from this location to find award winning hospitals on the map. You can search by 5, 10, 20, 30, 50, 100 or 500 miles from your location.

---

## SEARCH BY HOSPITAL

---

Type in the hospital name to find a specific hospital. The hospital's address and website are shown, if available.

---

## NARROW YOUR SEARCH BY CATEGORY

---

Narrow your search by selecting any category or categories to find hospitals recognized by the American Heart Association/American Stroke Association.

---

## RESET MAP

---

Clears any search options you have selected.

---

## PRINT MAP

---

Print the image of the map on your screen.

---

## PRINT LIST RESULT

---

Prints the entire list of hospitals in your search (shown on the left side of your screen).

---

## MAP/SATELLITE

---

View by Google map or Google satellite image to find your hospital.

---

## BLUE ICON WITH SINGLE DOT

---

Signifies that this facility received recognition from our Get With The Guidelines® program that helps hospitals deliver heart, stroke and resuscitation care consistent with the most up-to-date scientific guidelines.

---

## HEART-CHECK MARK ICON

---

Identifies hospitals that have met standards of medical care required to earn certification or accreditation for treating heart disease and stroke.

*This online Quality Improvement map should not be used to find a hospital during a critical situation. Call 911 immediately to be taken to the nearest available emergency medical center. The purpose of this website is to identify hospitals that have received recognition for achievement in American Heart Association/American Stroke Association healthcare quality improvement programs. The Association does not endorse hospitals on this list nor is this website intended for use in making medical decisions. Discuss hospital options with your physician to select the best hospital for you.*
